Nucora TECHNOLOGIES

Brought to you exclusively in the NDT Industry by TED!

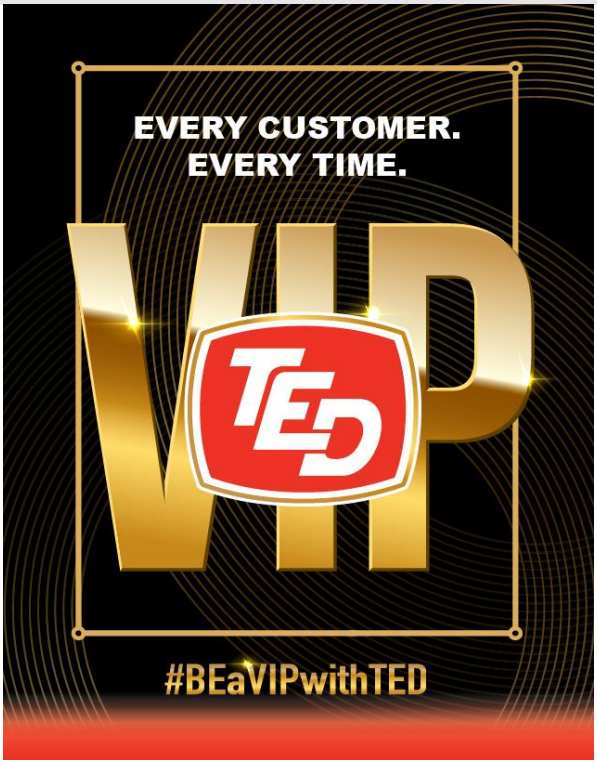

GET THE LEAD OUT

New Vendor Partner!

Non-toxic shielding for RT, DR, CT, Gamma and Neutron Radiography

Same protection as lead and concrete – without the headaches.

Q4 2025

Nucora TECHNOLOGIES

Lighter Weight | Smaller Footprint | No Heavy-Duty Support Structure | Modular & Easy to Install

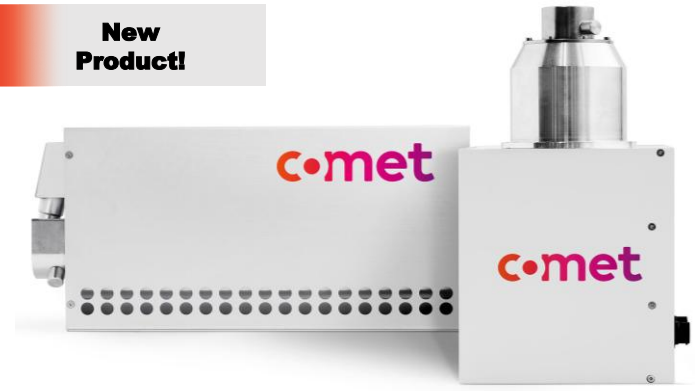

Sheild Your Technicians Without Toxicity

- Non-Toxic: Protect your team from radiation without exposing them to lead
- Lighter weight: reduce structural loads
- Smaller Footprints: Achieve the same shielding in less space vs. concrete
- Modular & Easy: Panelized systems install fast- ideal for retrofits and expansions
- High-Energy Performance: Matches lead/concrete at standard energies and can outperform at high energy
- Recyclable: Materials can be reclaimed at end of life

LEAD-FREE | NON-TOXIC | PROP 65 COMPLIANT | ROHS COMPLIANT | RECYCLABLE

New Product!

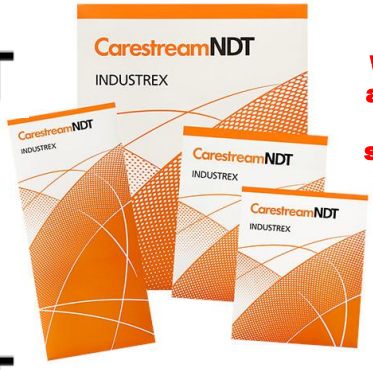

comet

Comet Xplorer Series

130 CUBE | 130 COMPACT

Built for the demands of modern production, the Xplorer series combines high magnification and resolution to inspect even the smallest components with precision. Its uniform intensity and symmetric focal spot ensure clear, reliable 3D and CT images—making defect detection faster, easier, and more accurate.

CarestreamNDT

Wraps around most shapes

Carestream INDUSTREX Flex GP, HR and XL Blue Digital Imaging Plates

Digital Imaging Plates

Designed for NDT computed radiography, INDUSTREX Digital Imaging Plates deliver the flexibility of film without wet processing. They enable fast image capture and reading—whether in the field or lab—and are available in multiple sizes to suit a wide range of applications.

CarestreamNDT

A Game Changer In Productivity

INDUSTREX HPX-1 Plus Digital System

The HPX-1 Plus is built for lab environments where high-resolution imaging is essential. With adjustable PMT and laser power, it allows precise image tuning for optimal results. Its ability to handle extra-long plates makes it especially suited for aerospace applications.

TELEDYNE ICM
Everywhereyoulook™

Teledyne ICM Go-Scan 1510 XR

Portable X-Ray Detectors

Teledyne ICM and Teledyne DALSA have joined forces to deliver the first fully integrated digital portable X-ray solution for NDT. Designed with the end user in mind, the Go-Scan 1510 XR combines a high-resolution Teledyne DALSA CMOS detector with Teledyne ICM's CP SERIES generator. The result: a lightweight, user-friendly system that delivers real-time feedback, outstanding image quality, and proven durability in the field.

VisiConsult
X-ray Systems & Solutions

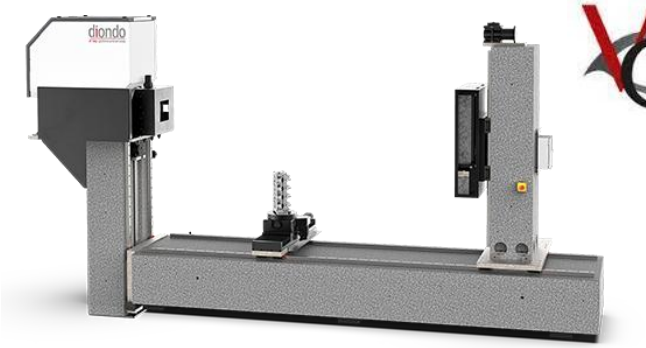

VisiConsult PRO FI

Universal High-Speed Inspection System

A high-speed, universal inspection system for small to large castings. Features a flexible table, easy program setup (no coding required), and manual or automated operation. Ready for seamless integration into robotic cells or production lines.

VisiConsult
X-ray Systems & Solutions

VisiConsult Diondo d7

High-Performance Linear Accelerator CT System

A high-performance CT system with a linear accelerator, perfect for inspecting dense components like engines and turbine blades. Delivers precise defect detection and accurate wall thickness evaluation.

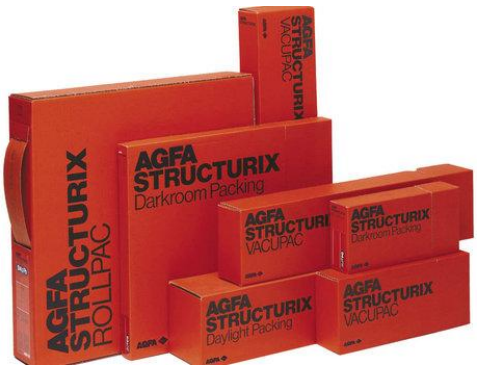

High Quality Radiographic Film

Structurix

X-ray Film

Waygate Technologies
a Baker Hughes business

Known for high-quality images and rugged durability, STRUCTURIX films deliver reliable performance across a full range—from ultrafine grain to high-speed—in all standard sheet sizes and rolls.

Waygate Technologies
a Baker Hughes business

Advanced Film Technology

CRxFlex

Computed Radiography (CR) Scanner

The CRxFlex™ is a multipurpose NDT workhorse—offering superior efficiency, performance, throughput, and image quality. It delivers excellent results at lower radiation doses for both isotope and X-ray imaging, with shorter exposure times, high read-out efficiency, improved SNR, and strong SRb.

Fujifilm IX Series Industrial X-Ray Film

High-Performance Radiographic Film for NDT Applications

The IX Series delivers high-resolution imaging with advanced emulsion technology for consistent, reliable NDT results. Suitable for a wide range of materials and thicknesses, these films offer excellent contrast and are compatible with manual and automatic processing. Available in various formats, including Envelopak.

Gulmay CP Series

3200W–4500W X-Ray Generators

Compatible with all major X-Ray tube brands

The CP Series offers high power and reliability across a wide voltage range (65–550 kV). Available in 3200W, 4000W, and 4500W models, they support small focal spot tubes for imaging and high-power tubes for dense materials. Ideal for automotive, aerospace, and long-duration tomography inspections.

Sonatest WAVE

Interactive Flaw Detector

The Wave integrates the latest technologies available in order to create a revolution in the ultrasonic non-destructive testing equipment market. Not only is it innovative, but the customizable interface also optimizes the daily workflow, and a unique and embedded interactive scan plan, with ray-tracing capability, simulation tools and CAD import capability, consolidates your results.

Sonatest WAVE 2.0

The Wave 2.0 update includes many new features & smart improvements including: Enhanced flexibility and richer probe libraries, Backwall Echo Attenuation (BEA), DAC, TCG, DGS, JIS, Custom logo's for reporting, Ukrainian language and an Updated welcome screen

Sonatest Veo3

Inspect with Confidence

Request a System Demo!

Building on the trusted Veo series, the Veo3 introduces a PCAP touchscreen, customizable user templates, and live TFM imaging for enhanced flaw detection. It delivers improved resolution and sizing capabilities while allowing inspectors to maintain their established workflows. This means users benefit from advanced technology without the need for retraining, combining innovation with familiar ease of use.

Sonatest WheelProbe 2

Composite Inspection & Corrosion Monitoring

The WheelProbe 2 delivers fast, user-friendly inspection with 1mm near-surface resolution using a 5MHz array—ideal for advanced composites and corrosion detection.

Sonatest Single Element WheelProbe

Single Element Wheel Probe

Uses Sonatest rubber technology for near-dry ultrasonic testing. Includes 15 mm probe (2–10 MHz), 38 mm tyre, and optical encoder. Compatible with standard flaw detectors.

ORDER ONLINE AT WWW.TEDNDT.COM

FLAWTECH

FlawTech API-UT-1 Mini Kit

Compact Version of the API-UT-1 Kit

Kit includes 4x carbon steel specimens with thickness ranging from 0.50”-1.00”. Includes three flaws per specimen. Kit comes with a complete documentation package and a carrying case.

vermon NDT

Made in the USA

Standard & Custom PAUT Probes & Wedges

Vermon NDT offers over 100 types of standard PAUT probes and wedges- in stock, ensuring fast delivery (1–10 days). Designed for reliability and accuracy, Vermon NDT Probes are compatible with all PAUT systems.

MAGNAFLUX

UT-X Powder

Ultrasonic Couplant Powder

Ultrasonic couplant powder with corrosion inhibitors for flaw detection and thickness gaging. Retains viscosity on rough steel surfaces like boiler tubes, welds, and ship plate. Mixes easily with water on-site; compact for transport or backup use.

DAKOTA ULTRASONICS
SOUND SOLUTIONS

MAGNAFLUX

Echogel

Economical Ultrasonic Couplant

Cost-effective, medium-thick couplant for flaw detection and thickness gauging on corroded or salt-caked surfaces. Resists corrosion and harsh conditions.

Dakota Ultrasonics FX80-DL (DFX-8)

Flaw Detector and Ultrasonic Thickness Gauge Z-250-0001

Designed for laboratory use, the FX80-DL combines powerful flaw detection and precise thickness gauging in one unit. It features a large QVGA display with a 60 Hz refresh rate and includes DAC, AWS, TCG, and DGS sizing toolkits for thorough flaw analysis. The thickness gauge supports Pulse-Echo, Echo-Echo, and other advanced modes for accurate measurements on both coated and uncoated materials.

DANATRONICS NDT Made Easy

Danatronics Echo 9

Corrosion Thickness Gauges

Danatronics’ newest ultrasonic thickness gage line, the ECHO 9 series represents its most advanced thickness gage ever. ECHO 9 offers a 3.5” high resolution sunlight readable color display with live A-Scan, echo to echo to ignore coatings, B-Scan, datalogger with up to 32GB of SD card memory and interface to Microsoft excel. The ECHO 9 is available in 4 models including the ECHO 9, ECHO 9DL, ECHO 9W and ECHO 9DLW. The vibrate on alarm feature is the world’s first and is great for loud environments.

SCREENING EAGLE

UT8000 Flaw Detection

Portable ultrasonic flaw detector for diverse materials and components. Ideal for field inspections and corrosion mapping, it offers traceable data, fast reporting, and rugged performance—plus unique rewind and logbook features.

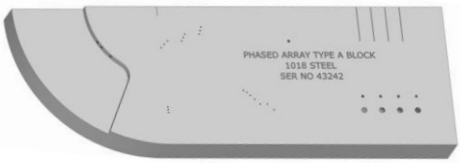

SCREENING EAGLE

Pundit Ultrasonic PD8050

Consolidated power in a single device

The World's Lightest Wireless Ultrasonic Imaging System with Augmented Reality and AI Capabilities. Real-time imaging, weight optimization and AI assistance. Large scale 2D, 3D, heatmap and AR visualization modes. Superior image clarity with control of all transmission parameters

PH TOOL REFERENCE STANDARDS
The STANDARD of Excellence

Ph Tool Phased Array Type A Block

Essential for phased array setup and calibration—verifies angle, wedge delay, sensitivity, DAC/TCG, and more. Sized like an IIW block; available in Steel, Aluminum, Stainless, or custom alloys.

PH Tool ASME Basic Cal Blocks

0.5” Thick- 5” Thick

0.50.5"–5" thick blocks in A516-70 Steel, 7075-T6 Aluminum, 304 Stainless, or custom alloys. Features 3 side-drilled holes and 2 EDM notches per ASME Sec V Art. 4 Fig. T-434.2.1 for UT weld reference calibration.

3 YEARS WARRANTY

Demo Available!

Labino Headlight

UVG5 2.0 Series

The UVG5 2.0 series are hands-free UV headlights ideal for field Magnetic Particle Inspection, where both hands are needed for equipment - like spray cans and yokes. Perfect for use in tight or elevated spaces, each model differs by beam size, intensity, and the inclusion of a white light. All models feature IP68 waterproofing and penetrant-resistant sealing.

LABINO

4 YEARS WARRANTY

2 YEARS WARRANTY

LABINO

Demo Available!

Labino Apollo 3.0

UV & WH Light Meter

The Apollo 3.0 is a wireless radiometer/photometer that measures UV and visible light with a single sensor. Available as single or double kits, each sensor tracks both UV and white light. NIST-traceable and ISO 3059-12 compliant for reliable measurements.

PRICE ASSURANCE
on all Labino products. No price increases for customers related to any tariff increases on Labino products exported to the U.S.!

Labino Cosmos

UV LED Stationery Light

Engineered for wash stations, the Labino Cosmos offers excellent heat management and intuitive control. It covers a wide 2 x 2 meter (7 x 7 feet) area from 3 meters (10 feet)—one of the largest UV LED coverage zones available. Ideal for reliable, hands-free fluorescent inspections in demanding environments.

MET-L-CHEK®

Met-L-Chek D-70 Developer
Nonaqueous Developer

D-70 is a nonaqueous developer with absorbent powder suspended in a volatile solvent. Applied after penetrant removal and drying, it helps draw penetrant to the surface, enhancing flaw visibility. Shake well before use to redistribute particles.

MET-L-CHEK®

Met-L-Chek VBP-300 Visible Water Washable Penetrant

Met-L-Chek® VBP-300 is a visible water washable penetrant that's designed for use in general metalworking, welding, nuclear, and automotive to detect surface flaws.

REL TAM Panels

P&W APPROVED TAM 146040-1 and 146040-2

REL

New Vendor Partner!

Pratt & Whitney approved TAM 146040-1 and TAM 146040-2 panels. These panels are uniquely serialized and include a protective case with panel certificate of conformance, 1:1 photo of manufactured defects and serialized crack size certification document. The panels are made in the USA.

MAGNAFLUX

Magnaflux ZL-425
Water-Based Fluorescent Penetrant

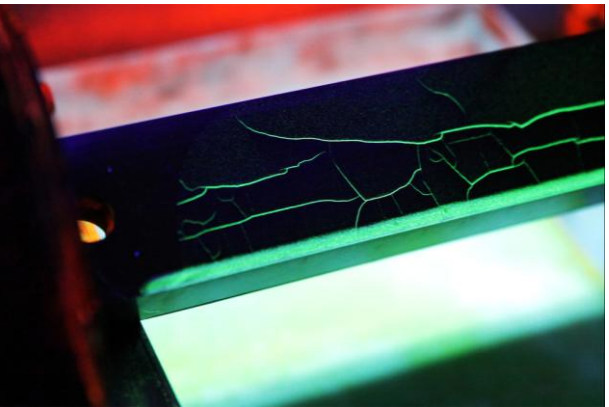

Water-based, water washable level 1 fluorescent penetrant; contains no petroleum distillates allowing direct drain disposal.

MAGNAFLUX

Magnaflux EV6000
Hand-Held LED UV Lamp

The EV6000 LED UV lamp is a portable, hand-held UV lamp for fluorescent non-destructive testing applications like fluorescent penetrant testing and fluorescent magnetic particle inspections

Circle Systems, Inc.

CircleSafe® 800A
Fluorescent Aerosol

CircleSafe® 800a uses Glow® 800 particles which have exceptional sensitivity, uniform size, and ideal magnetic characteristics for fluorescent magnetic particle inspection. CircleSafe® 800a is a fluorescent yellow/green powder premixed with our petroleum carrier fluid CircleSol M. Designed to be used with UV-A light to detect discontinuities typically found in the NDT of forgings, castings, welds, and piping.

PARKER
Magnetic Particle Inspection Instruments

Parker Contour Probe
B-300 Contour Probe

A lightweight (7.5 lbs) magnetic inspection yoke with adjustable legs for fast, reliable AC magnetic particle testing on parts of any size or shape.

Parker Contour Probe
B-100 Contour Probe

Light, durable AC yoke for precise ferrous metal inspection. One-person use, fully repairable, with a one-year warranty.

Chemetall
expect more

Chemetall 906 Visible Dye
Aerosol

Androx 906A is a visible light inspection penetrant that can be removed with water or solvents. Used for defect detection (cracks, laps, cold shuts, porosity). This is a low viscosity penetrant with excellent wetting properties that ensure optimal coverage.

Chemetall
expect more

Chemetall 9PR50 Solvent Remover 5 Gal.

Colorless, solvent-based penetrant remover. It has a high flash point, evaporates quickly and has a low sulphur and halogen content. Mainly used for the removal of both visible red dye and fluorescent penetrants. Can also be used as a solvent pre-cleaner prior to penetrant application.

Push Rod Camera System

VIS200

DANATRONICS NDT Made Easy

The Wohler VIS 200 Series delivers a powerful, portable solution for visual inspections. Featuring a compact push rod reel with a 1" camera head, extended-life battery, and rugged design, it combines advanced camera technology with cordless convenience for reliable performance in the field.

HITACHI
Inspire the Next

Hitachi X-MET8000 Range
Handheld XRF Analysers

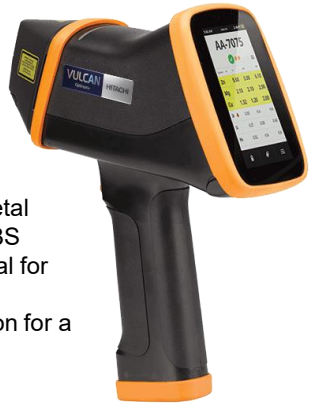

The X-MET8000 delivers fast, accurate analysis for a wide range of materials—metals, polymers, soils, ores, and more. Rugged and easy to use, it's ideal for on-site alloy ID and material verification you can trust.

HITACHI
Inspire the Next

Hitachi Vulcan+ Range
Handheld LIBS Analysers

The Vulcan+ offers fast, accurate metal analysis in just one second using LIBS technology—no X-rays required. Ideal for scrap sorting and PMI, it delivers consistent, reliable grade identification for a wide range of metals.

PLASTIFORM

L'Empreinte Dimensionnelle - Precision 3D replicas for quality control

Plastiforms avoid destructive testing and speeds up the quality control process

By using them, you can control your parts in less than 10 minutes and for less than $5, all without destroying them!

An Application for Every Problem

- Non-destructive dimensional control
- Indirection roughness testing
- Protection and masking
- Visual inspection of surface condition
- Reinforcement and maintenance

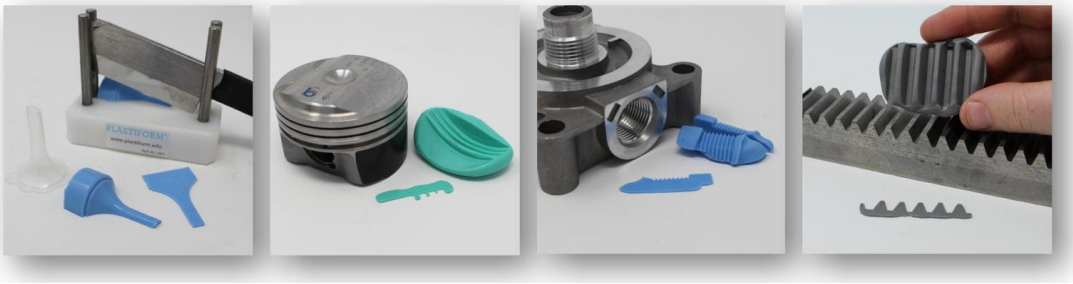

F-50
Fluid

F50 is the most versatile product of all plastiforms. Its technical characteristics allow it to solve most of the industry's dimensional control problems. It is recommended for taking impressions in simple or less complex internal shapes and can also be used for total and partial impressions.

ML-040
Complete Solution Case

The Complete Solution Case allows the user to test and explore the full range of Plastiform products. Whether you are an experienced user or a beginner, this set will provide a practical and effective way to maximize Plastiform's innovative solutions. The set includes a range of fluid, pasty and manual putty products along with several useful accessories which are all packaged together in a convenient carrying case.

VisiConsult XRH111 ECO USED!

Compact X-ray Cabinet

SALE PRICE: $160,000.00

Includes:

- XRH111 ECO X-ray cabinet shielded up to 225kV
- Detector: 130mm x 130mm - 127 µm
- Manipulator including 4 electric axes
- Compact Design and Layout
- High-end control panel next to cabinet
- Pneumatic Door with Comfort-feature
- Shutter – shields detector during warm-up
- Comet 160kV X-ray System with HP-11 Tube

Inline Semi Automated Lean Manufacturing FPI System USED!

SALE PRICE: $82,950.00

Includes:

- 18 cell dwell set up (6 Penetrant Dwell Cells, 6 Dryer Cells, 6 Developer Dwell Cells)
- HMI for system monitoring and adjustment (Inclusive of pressure and temp sensors for all stations)
- Display status of parts in system and monitors fluid temps, pressure, dryer temps and air pressure
- Mist collector for penetrant overspray
- Black light for penetrant application and wash
- Fully enclosed in curtains
- Inspection booth with white light, curtains and fan
